

Year 3 have learnt and carried out experiments about magnets and magnetism.

We've created maps and learned about the importance and process of recycling. We used recyclables to build the Iron Giant !

We have read The Iron Giant book by Ted Hughes and at the end of the half term turned the classroom into the cinema and watched the movie!

We also visited Chelmsford Cathedral where had lots of fun participating in various activities such as exploring visual messages of the Cathedral and creating self portraits.
